### ***Reviews***

*This book is definitely not straightforward to get started on studying but extremely exciting to read. It is really simplistic but shocks in the 50 percent of the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

This would enable the agency to make many trade determinations before goods arrive, facilitating the low risk shipments and allowing CBP to focus trade resources on high-risk shipments. Pillar Two: Automated Targeting The second pillar is evaluating that advance information for risk of terrorism. To do this, CBP built the National Targeting Center ( NTC ), which stood up in October 2001. Using the Automated Targeting System ( ATS ), CBP has built in targeting or risk assessment rules and algorithms based upon strategic intelligence about the terrorist threat. ATS and other targeting systems are used to target trade risks, as well. As it has been developed, new capabilities have been added in ATS that allow CBP personnel to identify anomalies relevant to the trade mission. For example, ATS is now being used to target shipments that may violate pharmaceutical and Intellectual Property Rights ( IPR ) import laws. Coupled with the receipt of advance information, auto-mated targeting will enhance our ability to focus on priority trade issues. Pillar Three: Technology The third pillar is detection technology. CBP requires all high-risk containers ar-riving at U. S. ports of entry to be given security inspections, using NII and radi-ation detection devices. Non-intrusive inspection equipment has enabled CBP to do this, as has automated risk targeting for the terrorist threat. Technology also helps advance our trade mission. By speeding the security review process and eliminating...
